

HPL

These compact laminate panels are made of 70% natural wood fiber and thermosetting resin.

Very resistant, they are specially designed for exterior use and allow the creation of ventilated facades with an avant-garde and spectacular design.

Thanks to their non-porous surface dirt does not cling, making maintenance less regular and easier!

The + :

Wide range of colors and finishes

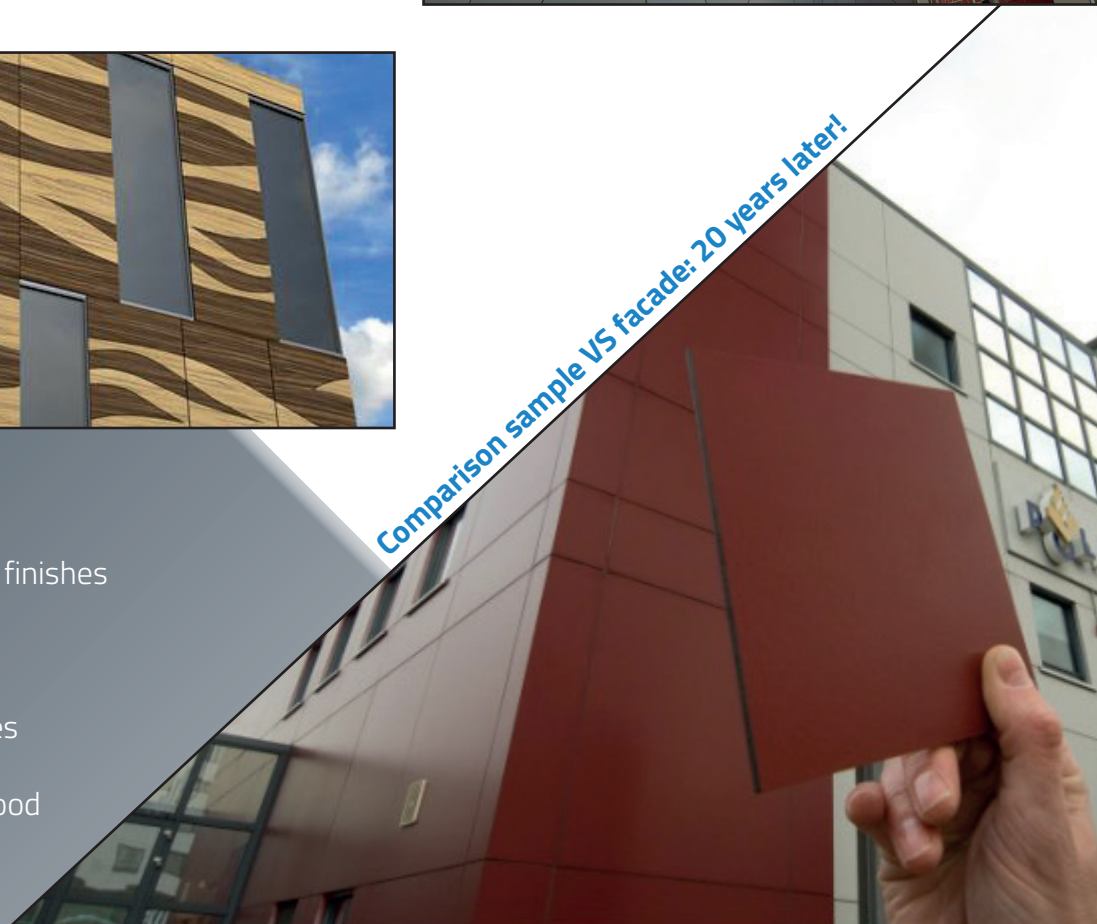

No minimum order

Infinite design possibilities

Created from recycled wood

Durability of colors

Comparison sample VS facade: 20 years later!
